**Asunto:** Trilogue project - Technical meeting for workshops planning follow up

Dear all,

Thank you for the very productive meeting on Wednesday.

I draft below the main points of the meeting and I attach the updated table.

### Meeting participants

DEKEYSER Wout (CONSILIUM)

FEYAERTS Guido (CONSILIUM)

SIX Luc (CONSILIUM)

DUDAS Elod (CONSILIUM)

PALAIKOS Emmanouil (CONSILIUM)

STUER Gunther (CONSILIUM)

DREEZEN Stijn (CONSILIUM)

ALARI Gianluigi (EP)

FEHERPATAKY Michal (EP)

MENDO GOMEZ Angel Ventura (EP)

KOUKLAKIS George (EP)

### **Trigger for the workshops**

Mandate of the Trilogue project Steering Committee to the operational team to prepare a solution architecture and a roadmap following the Option 1.3 as the preferred one (Option 1.3, in short: Joint EP and CEU project, EP development of the solution reusing the EP e-Parliament developed components, adapting and CEU integrating the solution in their technical environments)

### **Objective of the workshops**

Present the existing e-Parliament components

Start the collaboration of the EP and CEU teams to assess the reusability and compliance with the technical environments and identify functional gaps with respect to the agreed solution (dynamic mock-ups jointly developed and refined by EP and CEU) as well as technical problems in view of the solution integration into CEU environment.

### **Schedule of workshops**

Storage 29/11/2016 (documentation to be sent soon in a separate email to the workshop participants)

Editor 7/12/2016

DM-XML 13/12/2016

eTrustX last week of December

DM-XML console, first week of January 2017

The weeks following will be reserved for the preparation and review of the final deliverables the SC has requested.

For the Format area, the XML4EP specifications will be used and the library presentation will be included in the storage session.

The EPS-TPL is EP specific, sharing the knowledge for the functionality it covers can be useful.

### **Cycles of collaboration**

Presentation (during the workshop – estimated duration ½ day including Q&As, 10.30-12.30 and 14.00-16.00)

Discovery (during and following the workshop, through the existing documentation, further Q&As – estimated duration 2 days after the workshop)

GAP analysis (estimated duration 1 day after discovery)

### **Deliverables**

After each component workshop: assessment and GAP analysis, draft a joint short report of the findings (what can be re-used, compliance with existing architectures and technical environment, what adaptations are needed, what are the functional gaps, etc)

At the end of all the workshops, assessment report (reusing the previous reports), proposed Solution Architecture and draft roadmap

Best regards,

George
